

Application No.: 10/658,337  
Amendment dated November 10, 2005  
Reply to Office Action of June 15, 2005

Amendments to the Specification

Please replace the first full paragraph on page 8 with the following amended paragraph:

-- Fig. 6 illustrates the fifth embodiment of the metal lip jig rig 190. The fifth embodiment of the metal lip jig rig 190 has an area 28 (See Figure 3) between the first aperture 40 and the second aperture 60 that is an area molded over 200. Jig rig 190 may also have a third aperture [[80]] 81. To accommodate the area molded over 200 at the area 28 between the first aperture 40 and the second aperture 60, the plurality of spurs 70 provided in the first embodiment of the metal lip jig rig 10 are replaced with bait holder 75. The plurality of spurs 70 are typically made of bendable wire that can hold a third hook (not shown) or bait, while bait holders 75 act like spikes, with bait being struck on the angled bait holder 75. The area molded over 200 is a smooth and clean surface that is produced with non-toxic metal or plastic polymer. --
